BORG LA BAGNAIA has acquired a new feature, a conference centre. The structure is a unique venue, designed to meet the different needs of organising unforgettable events, in a hillside setting defined as "the window on the world", thanks to its breathtaking view of Siena and the hills that surround it.

With a seating capacity for 450 people, the centre's modular and versatile design enables it to offer a range of original solutions. The simple yet refined furnishings make it the ideal backdrop for high-level cultural events, theatrical performances and conferences.
